

# Looking for ways to cut your company's energy bills?

## ENVIRONMENT & ENERGY

**With rapidly escalating power and gas prices, companies should develop strategies to minimise the impact of price increases on their operations. Ai Group's Energy and Sustainable Business Help Desk can assist you.**

Ai Group's Energy and Sustainable Business Help Desk provides specialist advice on energy management with proven capability in energy contract negotiations. The Help Desk has assisted members achieve substantial savings and reduce operating costs. The Help Desk has a range of services to assist Ai Group member companies. Typical situations where we can help include:

- How do I compare my price quotations with current market prices for energy?
- Which retail contract offer should I choose? One-year, two-years or three-years?
- Which retailers should I get quotes from?
- Should I get contracts for both electricity and gas from the same retailer?
- Can I put all the sites for my company in one contract?
- Does it make any difference when I get quotations?
- Am I using the correct network tariff?
- How much will Green Energy cost?
- Am I being charged the correct rates?
- How can I change my equipment usage to cut costs?
- Can the Help Desk assist with my energy contract negotiations?

Ai Group's Energy and Sustainable Business Help Desk offers a range of energy-related free advice and specialised services at a discounted rate to member companies.

Ai Group's Carbon Assist program can also help you identify options to save energy, reduce emissions and minimise exposure to continuing increases in energy prices.
