

Have Your Say – Ai Group’s Environment Working Groups

E N V I R O N M E N T & E N E R G Y

The environmental issues affecting your business can often be overwhelming. But here at Ai Group, we’ve created a forum where you can stay up-to-date on the latest developments and find assistance with the specific challenges facing your business.

Ai Group’s Environment Working Groups will help you:

- Keep up-to-date with the latest developments on environment policies and programs from environmental regulators and agencies as well as industry leaders
- Anticipate regulatory and policy changes that impact your operations
- Network with peers in similar roles
- Receive regular updates on environment-related information for your business

The Environment Working Groups also offer great opportunities to:

- Assist Ai Group in developing policy positions to government
- Provide support, ideas and advice to other Ai Group members on environmental issues
- Have direct input on the development and delivery of Ai Group programs that assist members in responding appropriately to government policy

The working groups meet regularly in New South Wales, Victoria, South Australia and Queensland, and consist of Chief Executives, General Managers, and Environmental/Sustainability Managers from across Ai Group’s broad membership.
