 AUSTRALIAN INDUSTRY GROUP

# Energy & Sustainable Business Help Desk

---

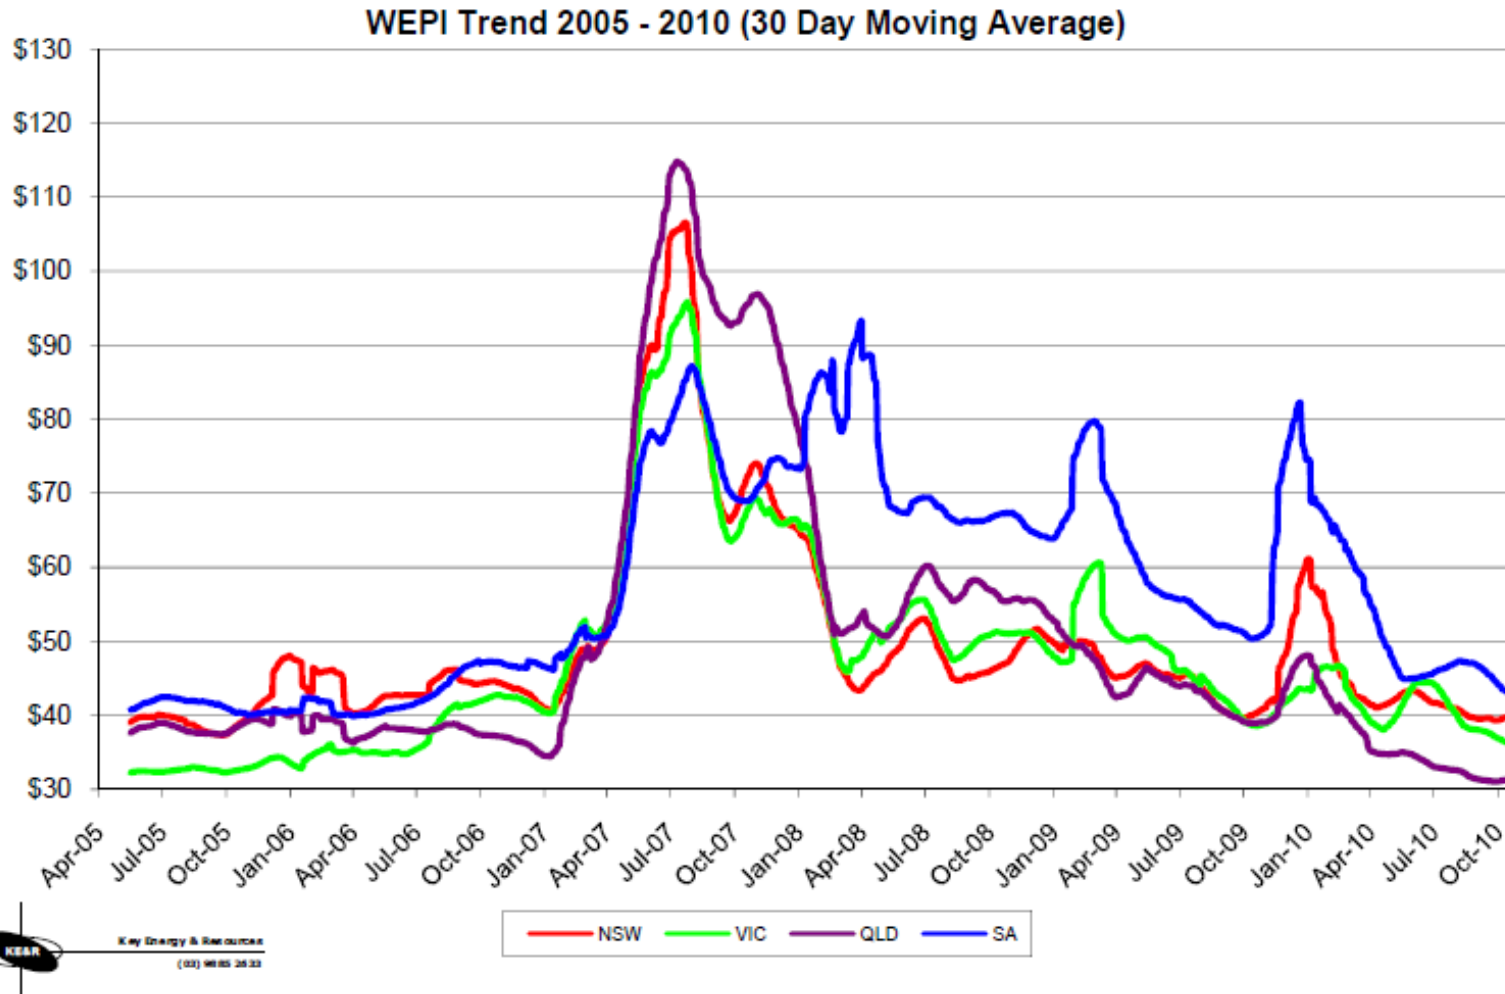

Ai Group's Energy and Sustainable Help Desk provides expert advice to members on environment management and energy issues including:

- Environmental compliance issues
- Energy contract negotiations and tariff reviews
- Water and trade waste pricing
- Environmental Management Systems (EMS)
- Auditing (water and energy)
- Australian Packaging Covenant (APC)
- Identification of funding opportunities

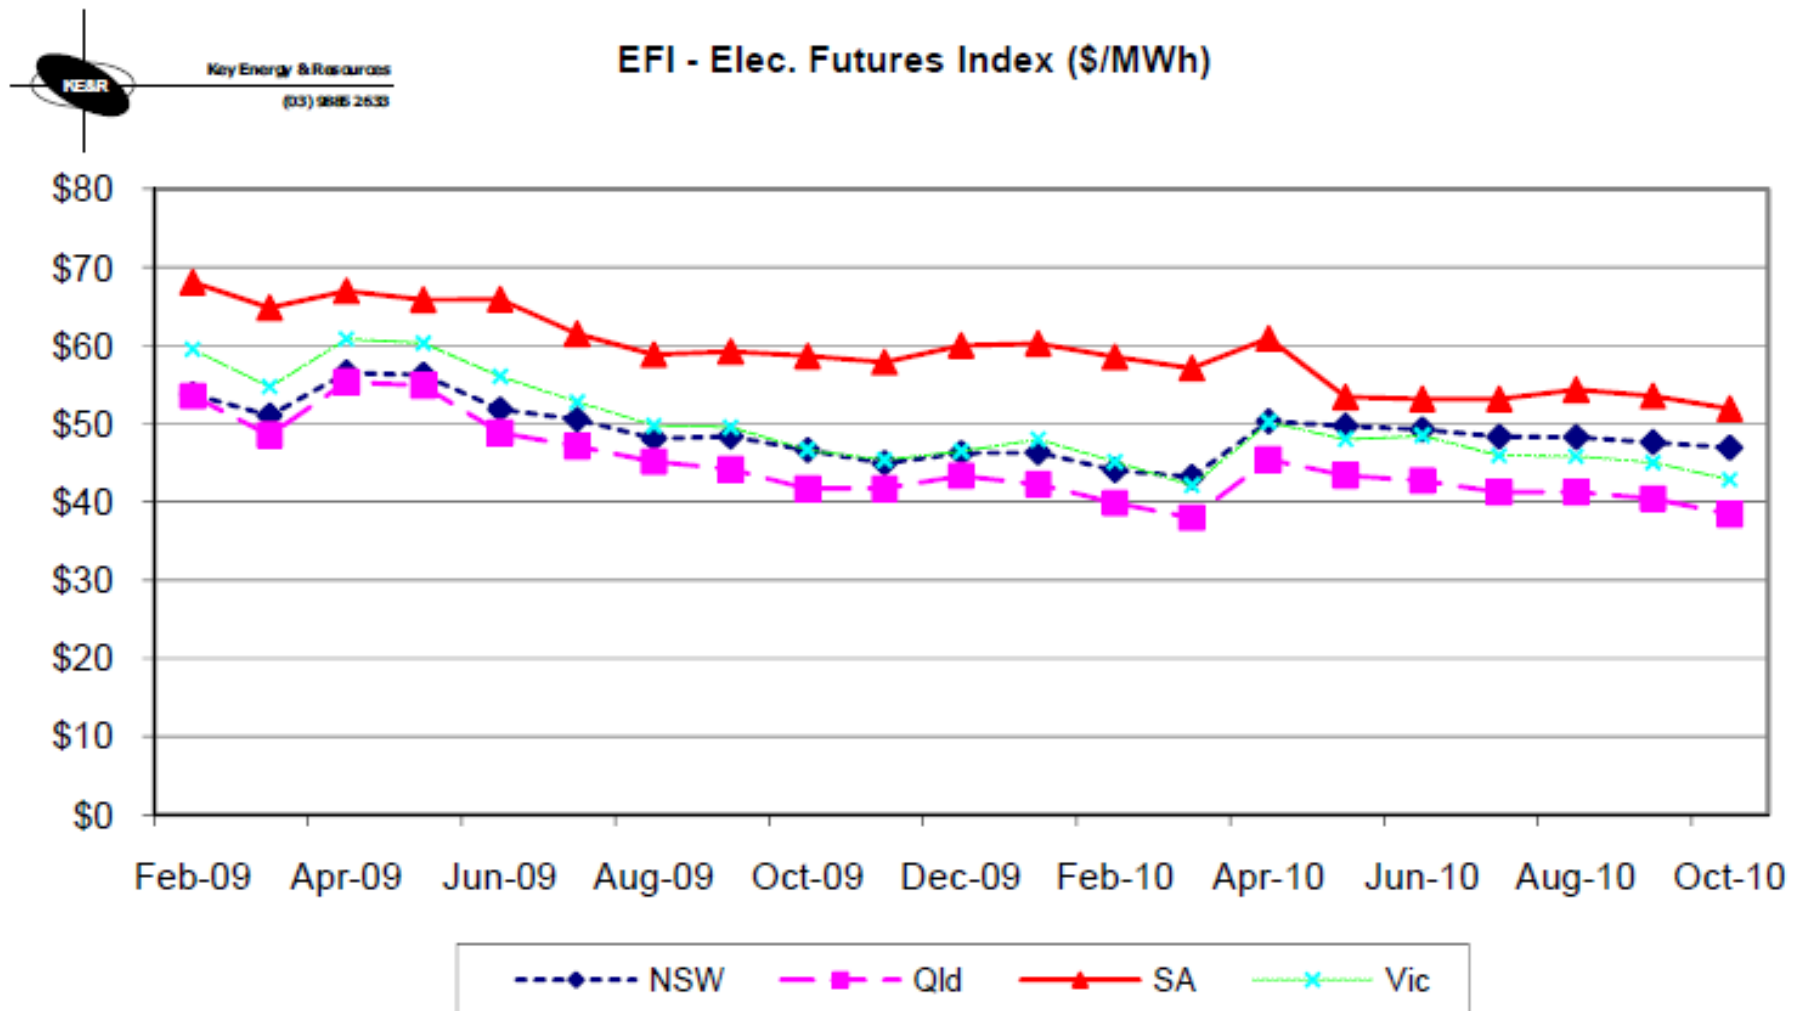

Contact Ai Group's energy and sustainable business help desk on **1300 733 752** or [sustainablebusiness@aigroup.asn.au](mailto:sustainablebusiness@aigroup.asn.au) to discuss how we can help improve your environmental performance and reduce operating costs.

# Wholesale Electricity Market Index

# Electricity Futures Index

# Demand tariffs

---

- Monthly maximum demand (over half an hour)
- Contract demand / capacity demand (always charge at this rate)
- You need to know the structure of your tariff to understand the benefits of reducing demand
- If you are assigned a capacity figure, negotiate with your LNSP
- We are not all equal: a flat industrial load will attract a better price than temperature dependent operators
